2019

PRODUCT GUIDE

Rental Equipment Directory.

WELCOME

Welcome to our 2019 Rental Guide.

Here you will find a summary of the key products we stock. If there's something specific you are looking for, please get in touch as we are continually updating our range of products.

We don't list rental pricing as we understand that its always better to have a discussion to best evaluate the needs and expectations of our clients. That way we can advise on practical solutions from a technical, logistical and financial perspective.

MJ Lights are a dynamic provider of event lighting rental and technical production services. Based in South Wales we service projects throughout the UK and Europe.

We provide equipment and services to a wide range of events from a simple conference to a full touring/festival lighting rig using a wide range of industry standard and specialist stocked equipment. Predominantly we are lighting based and have a wide variety of equipment available, with over 150 moving lights, 250 LED based fixtures, 350m of trussing, a huge range of generic lanterns together with the latest control equipment and wireless lighting technology, we have the equipment backing to cater for all event scales.

We have one of the UK's largest stock of illuminated furniture and shapes. Our 'Glo' range includes large quantities of IP rated battery operated LED illuminated products and shapes for a variety of creative uses including LED cubes, rectangles, spheres, bar sections and poseur tables.

We do not limit our services to lighting however, we have a wide range of staging equipment, modular LED Video screen systems, large quantities of temporary power equipment and draping as well as stocks of sound and AV equipment.

Our subsidiary Imajine, specialise in creative services aligned to the technical production of events. This includes Conceptual stage and event design including CAD visualisations and Plans, Project Management & Event consultancy.
In addition we produce bespoke products for events, including custom fabricated Decorative light products, Table centres, Laser cut and CNC fabricated decorative elements & Backdrops.

Out of the ordinary and bespoke technical solutions are a large proportion of our work, so often where we may not have a solution available we will purchase or manufacture a solution for you. Therefore if there is something you are looking for but is not listed here, please get in touch to discuss.
